

BONDY

Parent Guide

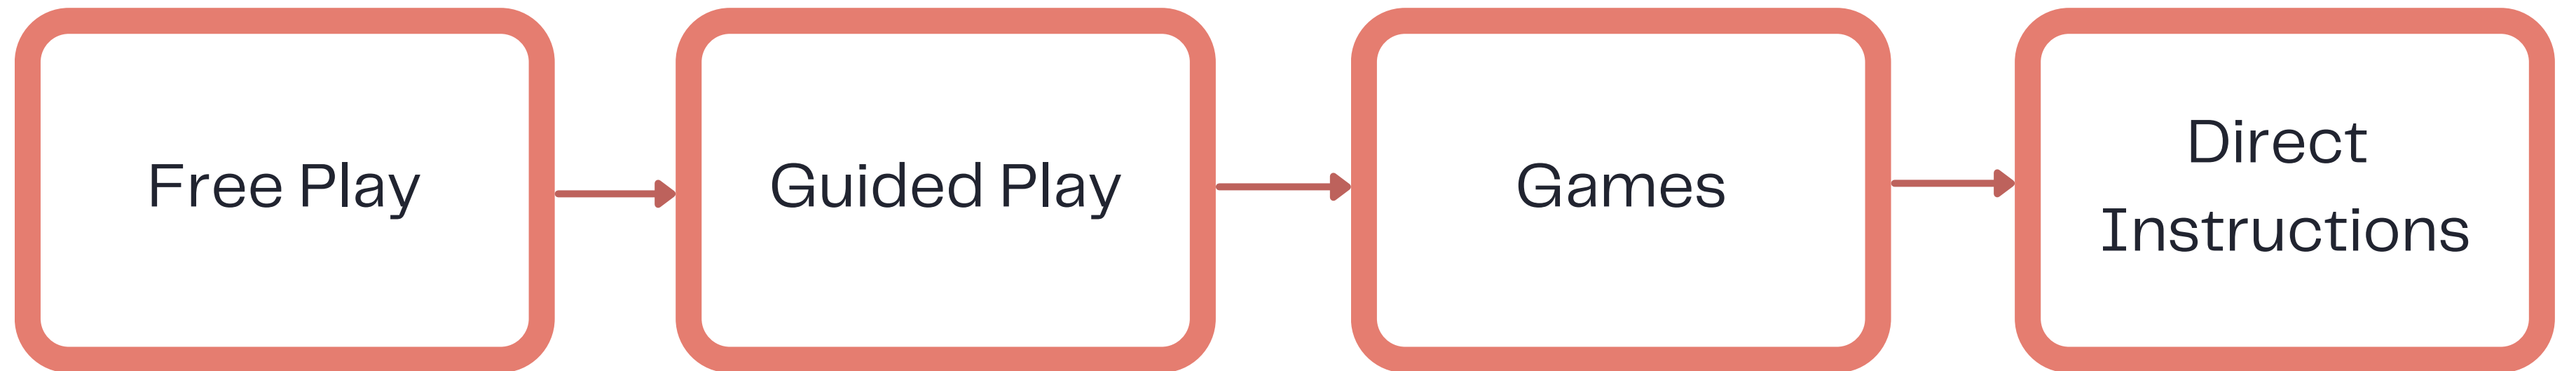

A guide to help your child deal with a the tough situation of his/her sibling in the Artificial Womb

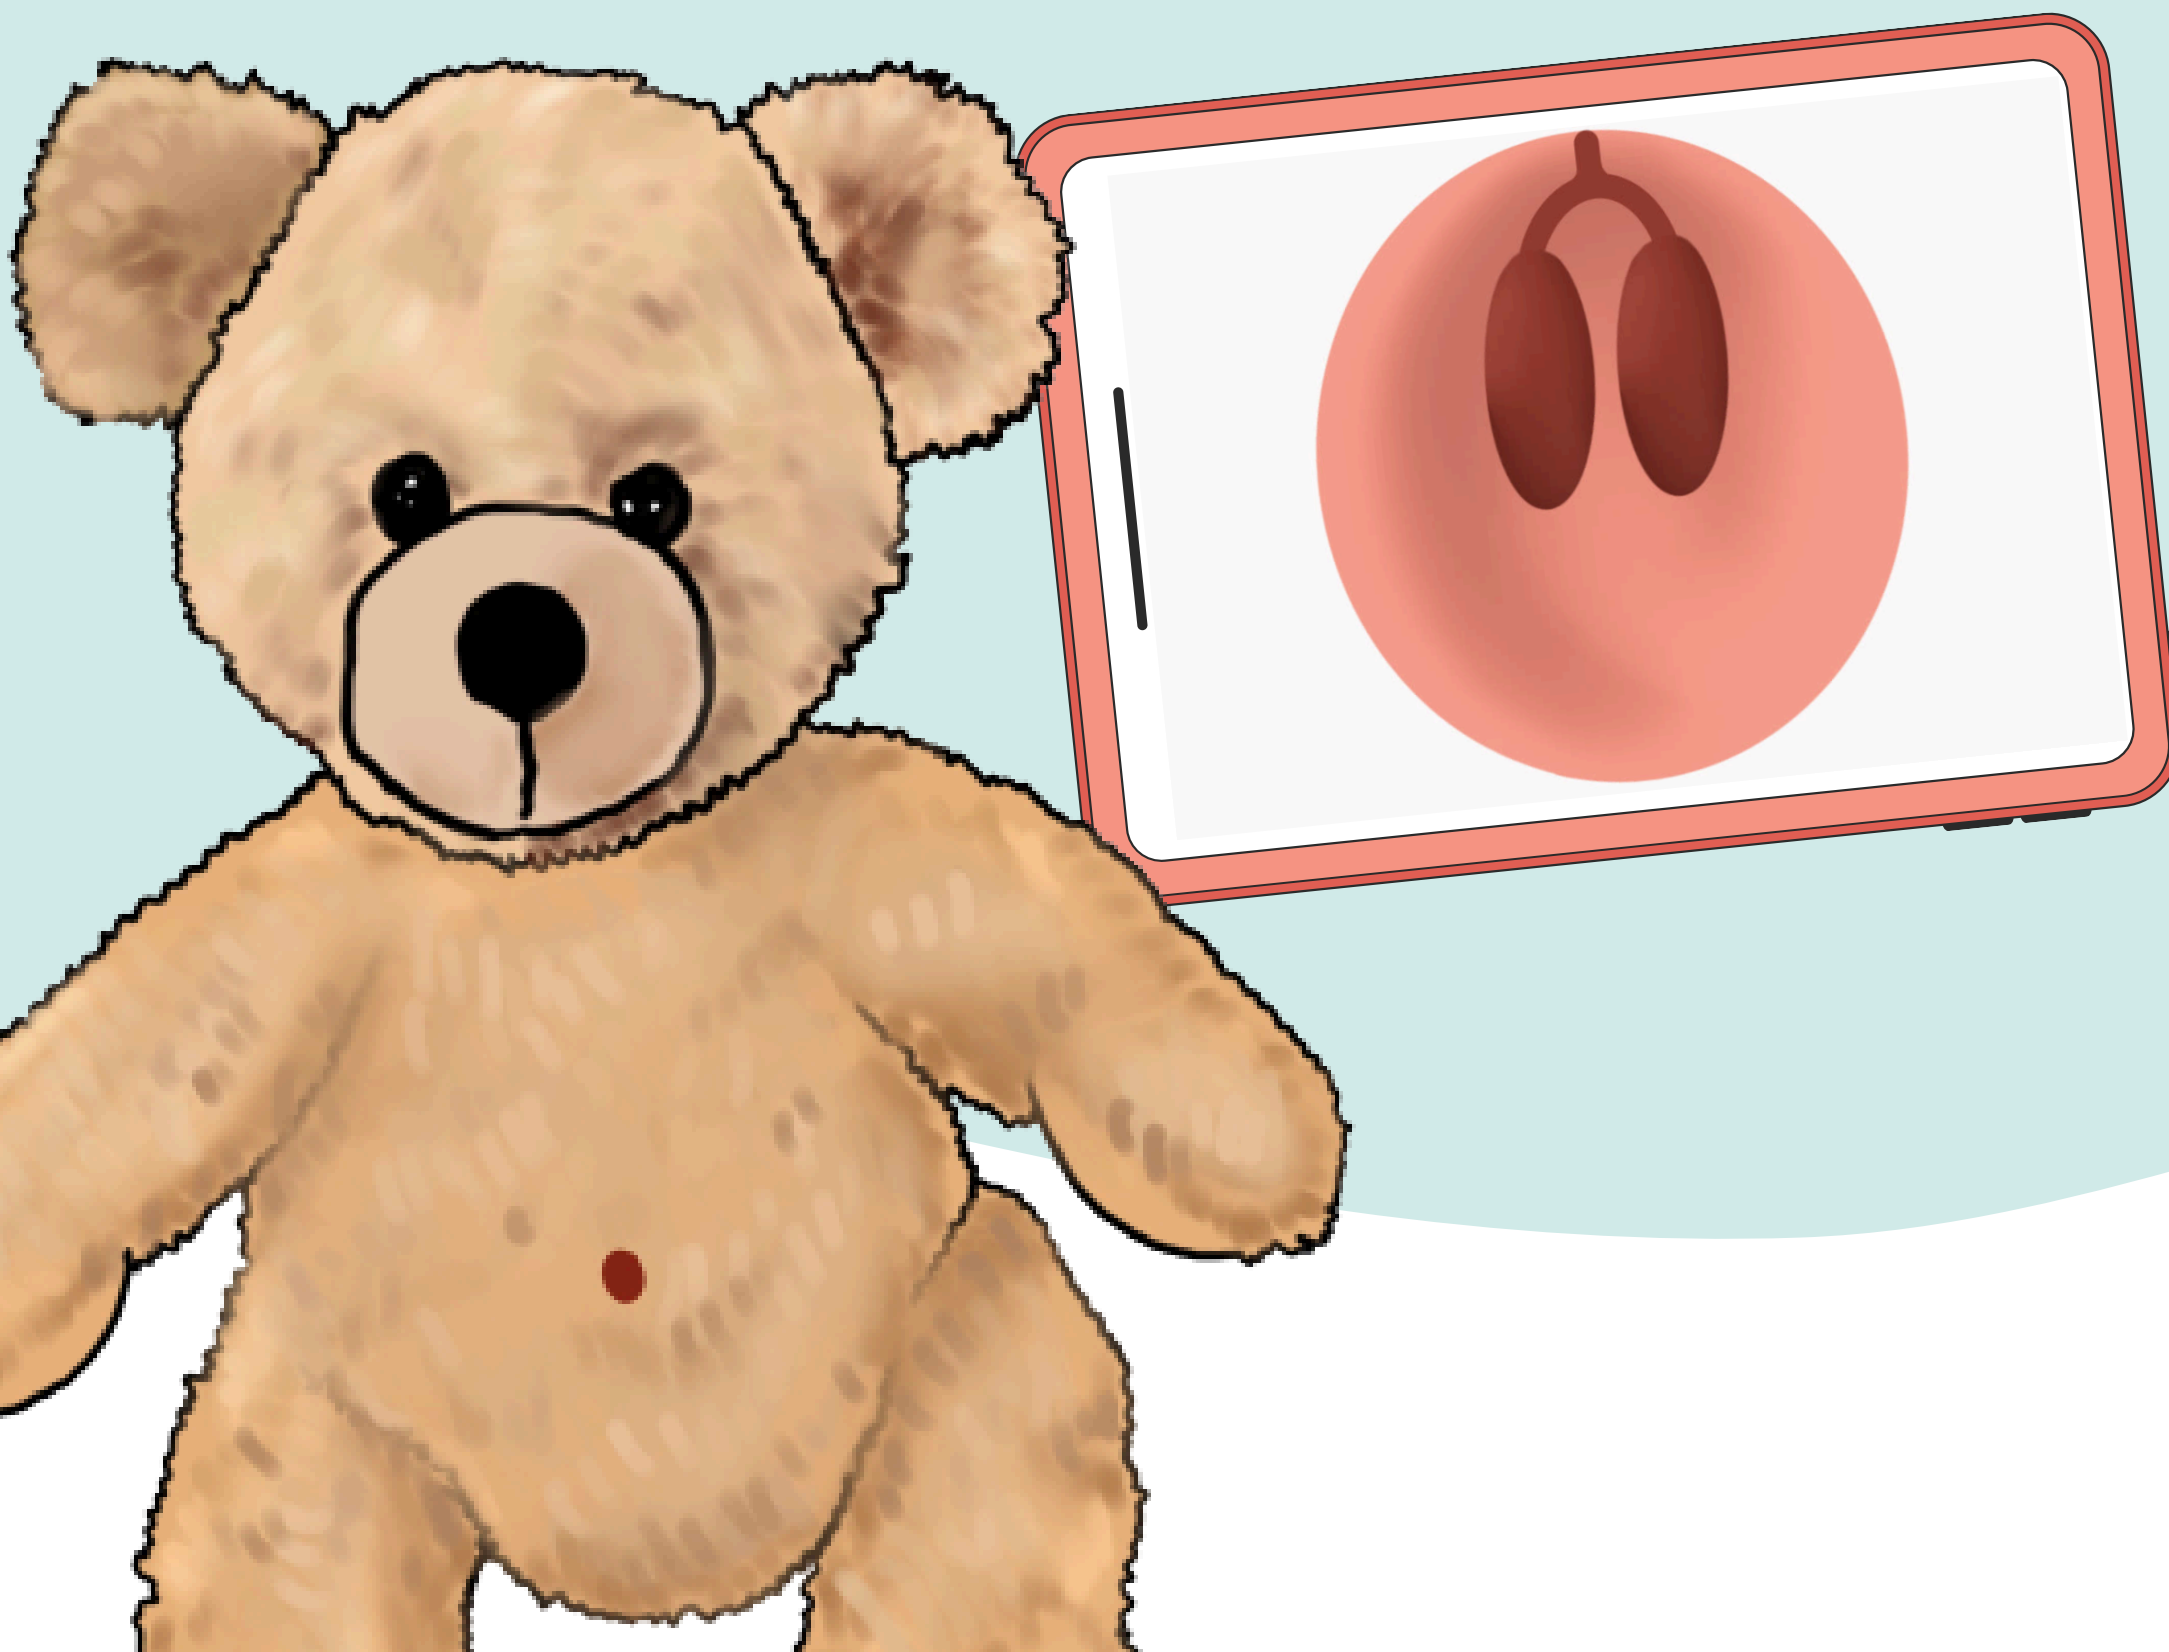

Bondy is an interactive product that teaches children in a playful way about the conditions and current situation of their new sibling who is in the artificial womb. This improves their understanding of the situation and creates more bonding between your first borns and their new sibling. The soft toy is focussed on the timeline of four weeks in which the preterm baby is in the artificial womb. In these four weeks you and your child can talk about this difficult topic and keep track of the learning progress and bonding process between siblings

Timeline

Four stages

From stage 3 on Bondy is connected to a screen

In stage 2 Bondy starts to give feedback via sound and touch

In stage 3 the screen starts playing an animation with explanation when your child touches one of the elements and gives challenges

In stage 4 the child needs to take care, reflect, give feedback and complete certain challenges.

Your child has mastered stage **1** when:

your child can name all the different elements

Food/nutrition

Temperature

Heart

lungs/breathing

Your child has mastered stage 2 when:

your child has discovered all the different elements and feels comfortable

He/She found the heart and recognizes the sound

He/She recognizes the temperature changes when touching Bondy

He/She found the umbilical cord and applies the lungs or nutrition tasks

He/She found the voice memo

Your child has mastered stage **3** when:

He/She understands digital explanation of the heart and completes challenges according to age

He/She understands digital explanation of the lungs and completes challenges according to age

He/She understands digital explanation of nutrition and completes challenges according to age

He/She understands digital explanation of the body temperature and completes challenges according to age

Your child has mastered stage 4 when:

your child can explain what all the components do while reflecting and taking care of Bondy

Heart beat to pump blood around

Lungs to breath

Food via umbilical cord to grow big and strong

Temperature to keep warm
